We bring our pre-configured industry Software solutions to you, our Industry Solution experts confirm their complete understanding of your business and collaboratively review your processes, whilst ensuring that standard industry practice is used to avoid lengthy and costly customizations.

The group distinguishes itself with over 10 years of experience of successful project development, with major technology giants, for fortune 500 clients, against the backdrop of increasing demand for complex yet secure and efficient software services in India, USA, UK and other parts of the world.

Combining unmatched experience and specialized skills across more than 40 industries, 15 types of Software and all business functions — DigiEn Infosoft LLP works at the intersection of business and technology to help clients improve their performance and create sustainable value for their stakeholders.

VISION

To become leading technology providers for One Umbrella and Information Security solutions for domestic organizations.

MISSION

To manoeuvre organizations towards digitization and participate in their growth stories. Provide best information security to organizations by crafting perfect policies and implementations.

WHAT IS **iON**

iON, or Intelligent Organization Neurals Software, is business software that integrates and runs all aspects of your business – everything from traceability of raw materials, management and optimization of inventory, production planning and scheduling, to financial controls and even customer relationship management. A business process management software system, like DigiEn iON, enables businesses to identify waste, eliminate inefficiencies, improve customer relations and facilitate real-time collaboration.

COMPANIES

GROW 35% FASTER

WITH BETTER DATA.

BECAUSE INTEGRATED INFORMATION IS THE KEY

iON systems enable businesses to have greater insight and visibility into their supply chain operations. Access to this key information allows them to make critical business decisions and to maintain a competitive edge in their industry, no matter how big or small the competition may be. An iON system gives 360° visibility into operations, so problems are more easily identified and employees can make informed decisions. Organisational data is always current, thanks to real-time integration between financial, distribution and manufacturing solutions.

HOW CAN DIGIEN **iON** HELP ORGANISATIONS?

DigiEn iON offers solutions that can fit your specific needs with options that work the way your business works. DigiEn iON allows you to achieve greater productivity and control providing the optimal platform on which to advance your business. Built with industry- specific focus, DigiEn iON provides a strategic foundation that will integrate your entire enterprise on one platform enabling you to excel in today's global marketplace.

DESIGNED FOR GROWTH

DigiEn **iON** solutions can provide the backbone of an agile, flexible system that helps your business grow, adapt quickly to change, and take advantage of new business opportunities. Simple to use, straightforward to implement, and quick to adapt, DigiEn **iON** solutions can be delivered in the way that works best for your organization—via the cloud or on-premises. This will strengthen your position in the marketplace.

EVOLVE FAST WITH FLEXIBLE PRODUCT SPECIFICATIONS THAT SUPPORT MULTIPLE PROCESSES.

THE SOLUTION

The robust iON system has the following primary benefits for your business:

1. Streamlined business processes
   iON system brings all your data together. It improves bottlenecks in the business processes.
   - o Centralized data saves money
   - o Opportunity for workflow automation
2. Promotes strongly coupled organizations
   Organizations can harbor disconnect between departments. iON system can prevent departmental blind spots.
   - o Autonomy and cooperation
   - o Collaborative ecosystem
3. Better tracking: more control and tracing
   Whether your enterprise deals with physical or digital products, iON system provide an easy way to keep track of your products.
   - o Visualizing movement of products and services
   - o Real-time tracking
4. Identification of improvements
   Today managing a large enterprise means relying on Business Intelligence (BI). Benefits of iON system becomes self-evident as you try to plan your next BI strategy.
   - o BI dependent on good iON data
   - o Fast decision-making
5. Efficient customer service
   iON provides sales and customer service with a better communication channel. It leads to better customer care and sales forecasting.
   - o Customers and suppliers
   - o Prioritizing valuable customers
6. Ensure regulatory compliance and security
   Regulatory compliance is an essential part of a successful iON tool.
   - o Built-in compliance support
   - o Compliance gets prioritized
